Felipe Gomes Miyazato

Structured data and analytics for monetization São Paulo, São Paulo, Brazil

Summary

I am a physicist from IFUSP. I have been working since 2017 mainly with data analysis and engineering. Currently, I aim to consolidate a broad set of skill to work with data from architecture and design to the analytics and research end.

Experience

Pinterest

Data Engineer

September 2024 - Present (1 year 1 month)

Santa Bárbara d'Oeste, São Paulo, Brazil

- Data analysis and BI with Superset dashboards and iPython notebooks
- ETLs with airflow for big data with Spark and Presto
- Develop custom data integrations for internal tooling

BairesDev

Data Engineer

September 2024 - Present (1 year 1 month)

Santa Bárbara d'Oeste, São Paulo, Brazil

As a third-party data engineer, I design, build, and maintain data pipelines for the client's internal data engineering team. My responsibilities includes working with ETL processes, analytical tool and cross-team collaboration. I leverage technologies such as Python, SparkSQL, Presto/Trino and Superset.

GV2C Consulting & Solutions
Robotic Process Automation Consultant

November 2023 - September 2024 (11 months)

As a third-party contractor, I worked inside Ambev's internal process automation team to design and deliver Robotic Process Automation (RPA) solutions. I identified automation opportunities, analyzed business requirements, developed and implemented bots that unlocked streamline key processes. Focus is on leveraging RPA tools like Python (Selenium, SQLalchemy, API integrations...) and ServiceNow (AppEngine, Mid-servers, API integrations...).

Ali Crédito

Data specialist

January 2022 - August 2023 (1 year 8 months)

São Paulo, Brazil

- Data analysis and BI with dashboards and iPython notebooks
- Data mining and web scraping for databases and CRM enrichment
- Design, development and management of integrations, data pipelines, process automations, ETLs, databases, calculation engines for financial products and CRM with Python and SQL in AWS
- Technical leadership with team and project management, code review
- Operational support and monitoring

GV2C Consulting & Solutions

Data Engineer

October 2020 - December 2021 (1 year 3 months)

- Automation and process optimization consulting for accounting reports
- Development of Python ETLs with cookiecutter
- Project planning and management

Freelance

Data Miner

July 2020 - August 2020 (2 months)

- Data mining and database consolidation scientific research purposes
- Project management
- Web-scraping with Scrapy and REST API. Parallel data processing with Dask

Predicta

Data Scientist

January 2020 - March 2020 (3 months)

- Development of Python ETLs in GCP environment (Big Query, Cloud Functions, and blob storages)
- Development of data integrations with Google digital marketing platforms

TEVEC Inteligência Artificial

Data scientist

July 2018 - November 2019 (1 year 5 months)

- Development and analysis of ML models with scikit-learn
- Modeling and analysis of time series for retail sales volume forecasts and supply chain optimization

Media Portal Soluções Software developer January 2017 - March 2017 (3 months)

São Paulo, São Paulo, Brasil

- Projeto de integração de serviços de redes sociais com serviços Al para implementação de sistema de ranqueamento de conteúdo

Education

Universidade de São Paulo Bachelor's degree, Molecular Sciences · (July 2014)

IFUSP

Bachelor's degree, Physics · (March 2014 - June 2020)
